Hacking for good

egeste@egeste.net

---

## Summary

Passionate software engineer looking to continue developing innovative javascript web interfaces in a position that presents an opportunity to solve interesting challenges, learn new technologies, and hopefully help make the world a little more awesome.

---

## Experience

### **Software Engineer at Lookout**

April 2013 - Present (1 year 5 months)

Designing and developing beautifully responsive html5 single-page applications.

Owning the entire lifecycle of software projects from version control and dependency management to unit testing and deployment.

Research, communication, and implementation of software design best practices.

### **Software Engineer at PBworks**

October 2011 - March 2013 (1 year 6 months)

Full web stack development with focus on responsive user experience. Responsible for software design, effort estimation, implementation, unit testing, integration and bug fixes.

*2 recommendations available upon request*

### **Backbone.js Consultant at Plug.dj**

September 2012 - January 2013 (5 months)

Developer consultant advising on building stable, scalable Backbone.js browser applications utilizing transitional APIs.

### **Software Engineer at Arrowhead Electronic Healthcare**

February 2010 - September 2011 (1 year 8 months)

Development, maintenance and enhancement of core software products, documentation, and data recovery strategies.

*1 recommendation available upon request*

### **Founding Member, Hackervangelist at ATX Hackerspace**

February 2009 - August 2011 (2 years 7 months)

Organizing, creating, making, hacking, and generally having a great time with electronics.

*1 recommendation available upon request*

### **Sr. Software Developer at Infrahealth Inc.**

February 2009 - April 2010 (1 year 3 months)

Development, deployment and maintenance of client and web applications for medical professionals, internal and public use. Network management, perimeter security and technical generalist.

---

## Projects

### **Lookout Platform/App Intel Console**

April 2013 to Present

Members: Steve Regester, Emil Ong, Nathan Smith, Jonathan Otto, Derek Halliday

Drawing on a global sensor network and next-generation security technology, the Lookout Platform solves mobile security problems for enterprises, governments, and mobile network operators.

### **OraculumJS - The Enterprise JavaScript MVC Framework**

January 2014 to Present

Members: Steve Regester, Gabriel Hernandez

Oraculum is part application framework and part behavior library. The application component of Oraculum is a set of definitions and mixins that emulate the behaviors of Chaplin. The behavior component of Oraculum is a set of definitions and mixins that aims to solve some of Backbone's most common use cases.

## Skills & Expertise

**Big Datum**

**JavaScript**

**Git**

**Web Applications**

**Apache**

**MySQL**

**Bash**

**Backbone.js**

**jQuery**

**Scalability**

**Linux**

**Underscore.js**

**Node.js**

**REST**

**MongoDB**

**AJAX**

**CentOS**

**Fedora**

**Red Hat Linux**

**Debian**

**Gentoo**

**Perl**

**Java**

**Arduino**

**Software Design**

**Chaplin**  
**d3.js**  
**Bootstrap**  
**Require.js**  
**Bower**  
**HTML5**  
**CSS3**  
**Karma**  
**Jasmine**  
**Sinon**  
**Lua**  
**OOP**  
**Amazon Web Services**  
**Open Source**  
**Jenkins**  
**gerrit**

---

## Education

**School of Hard Knocks**  
Autodidact, Winning, 2005

---

## Interests

technology, computer science, coding, making, hacking, modding, creativity

## 4 people have recommended Steve

"When I first met Steve I saw that he was very passionate and curious about learning. On the job he learned quickly and adapted well to our code base, and made positive recommendations for improving it. From the momentum I saw in his gathering of expertise I have no doubt that he'll continue to be a great engineer."

— **Tim Etler**, *Full Stack Developer, PBworks*, worked directly with Steve at PBworks

"Steve is a keen and passionate software developer with an inquisitive mind and an insatiable interest in learning and putting that new found knowledge to the test. Steve and I have worked directly on several projects at PBworks, successfully dealing with some complex challenges on a large, aging legacy code base, and bringing in some fresh new technologies like backbone.js that has helped to reduce technical debt and improve product features. Steve has a bright future in software innovation."

— **Kris Williams**, *Software Engineer, PBworks*, worked directly with Steve at PBworks

"Steve is a very bright and creative professional; he effectively uses these qualities to solve tough problems and improve productivity. Steve is a great team player who will do any task needed and makes coming to work more fun for everyone."

— **Jeff Albrecht**, *President & CEO, Arrowhead Electronic Healthcare*, managed Steve indirectly at Private

"Steve is an awesome programmer, a quick study, and overall great guy. He picks up programming languages easily and is a valuable person to have on your technical team. If you are looking for someone who knows his stuff and learns quickly, Steve is your guy."

— **Matthew McCabe**, *Software Engineer, Arrowhead Electronic Healthcare*, worked directly with Steve at ATX Hackerspace
